SUMMARY

Junior DevOps Engineer with hands-on experience building cloud infrastructure, containerized applications and automation solutions using AWS, Docker and Terraform. Experienced with Linux administration, CI/CD pipelines, Infrastructure as Code, Flask applications, REST APIs and deployment automation. Strong engineering background focused on reliability, troubleshooting and continuous improvement.

TECHNICAL SKILLS

Cloud: AWS (EC2, RDS)

Containers: Docker, Docker Compose

Infrastructure as Code: Terraform

CI/CD: GitHub Actions, GitLab CI/CD

Linux: Ubuntu

Programming: Python, Bash

Web: Flask, REST API, JWT Authentication, Session Management

Databases: PostgreSQL, MySQL, SQLite, Redis

Networking: TCP/IP, DNS, HTTP/HTTPS, Nginx, Reverse Proxy, Load Balancing

Version Control: Git, GitHub, GitLab

AI & Integrations: Ollama, SerpAPI

PROJECTS

Flask Authentication Platform

Built a secure authentication platform using Flask, JWT authentication and session management. Containerized the application with Docker, configured Nginx reverse proxy and automated deployment using GitLab CI/CD and AWS EC2.

Tech: Flask, JWT, Docker, Nginx, GitLab CI/CD, AWS EC2, Bash

AWS Terraform Flask Infrastructure

Provisioned AWS infrastructure using Terraform including EC2, Load Balancer and PostgreSQL RDS. Applied Infrastructure as Code principles and deployed Flask API workloads.

Tech: AWS, Terraform, Flask, Load Balancer, PostgreSQL RDS

Protected Image Delivery System

Built a secure media delivery platform using Flask, Docker and Nginx. Implemented reverse proxy architecture and protected resource access.

Tech: Flask, Docker, Nginx, Reverse Proxy

AI Telegram Sales Bot

Developed an AI-powered Telegram bot using Ollama and SerpAPI. Implemented automated customer interaction workflows and SQLite-based storage.

Tech: Python, Ollama, SerpAPI, SQLite

EXPERIENCE

Junior DevOps Engineer (Personal Projects)

2025 – Present

- Designed and deployed cloud infrastructure using AWS and Terraform
- Built containerized applications using Docker and Docker Compose
- Implemented CI/CD pipelines using GitHub Actions and GitLab CI/CD
- Developed Flask-based REST APIs and authentication services
- Automated deployment and administration tasks using Bash and Python
- Configured Linux environments, Nginx reverse proxies and networking components

EDUCATION

Bachelor's Degree in Energy Engineering
Ukrainian Engineering Pedagogical Academy

ENGLISH

Reading technical documentation and actively improving spoken and professional communication skills.
